Re: MID 005358049

Dear Mr. Lancucki:

I have reviewed your January 12, 1984 response to my December 8, 1983 RCRA deficiency letter.

Your submittal states that you have corrected the RCRA generator accumulation [40 CFR 262.34(a)] and personnel training [40 CFR 265.16] deficiencies.

The letter also indicates that no 262 Subpart D listed wastes are discharged to the treatment plant or lagoons. Analytical results supplied show that the wastewater discharged to the treatment plant and the sludge in the lagoons is not characteristically hazardous. The facility is therefore not subject to the 40 CFR 265 Subpart F requirements.

The facility should now be in full compliance with the RCRA generator standards. Your letter along with my comments will be forwarded to the U.S.E.P.A. Region V for their review.

Thank you for your cooperation. Feel free to contact me if you have questions.

Sincerely,

William E. Stone
